CAREER AND OBJECTIVE

I am looking for a job where I can use my skills and contribute to specific projects. I am a hardworking and detail-oriented person, committed to delivering good results and always trying to improve.

PROJECTS

• MAVEN MARKET ANALYSIS - POWER BI.

Maven Market Analysis aims to comprehensively analyze customer demographics, sales performance, product details, return patterns, and store statistics through seven dashboards. This data-driven approach provides actionable insights for strategic decision-making, enabling Maven to optimize operations, enhance customer engagement, and foster sustainable growth in the market.

• CLASSIC MODEL PROJECT - MS.EXCEL

The "Classic Models Project Report" offers a comprehensive analysis of sales, orders, and company dashboards, providing insights into product performance, regional sales dynamics, and employee-customer relationships. This integrated approach enables informed decision-making and strategic planning, emphasizing the importance of continuous monitoring to adapt to market dynamics and sustain success.

• DAIRY GOODS PROJECT - PYTHON

The "Dairy Goods Analysis" Python project examines and analyzes key metrics in the dairy industry, including the number of cows, land acquisition, geographical distribution, farm sizes, and product portfolios. Utilizing Python for data processing and visualization, the project delivers valuable insights for informed decision-making in the dairy sector.
